EXPERIENCE

igloolab

Cali, Colombia

Full Stack Web Developer

Sep. 2022 – Present

- I lead development of platforms for scientific events run by global pharmaceutical companies, with e-learning courses of up to 1,000 registered users and live streams for 300 simultaneous attendees.
- I lead a dermatology diagnostic-support tool for general practitioners, combining RAG over medical literature with image analysis using multimodal models.
- I automated conference badge generation, cutting a manual design-team process from days to minutes.
- I built interactive games and experiences (trivia, prize wheels, escape rooms) for conferences, both on the web and on digital kiosks, wiring physical buttons and sensors with Arduino.
- I ship around 3 projects a month and also own the DevOps side: I run the servers and answer for uptime on Digital Ocean, Vercel, Netlify and Azure.
- I gather requirements directly with clients and stay with the project from definition through to production.
- **Tech:** Next.js, React, TypeScript, Python, FastAPI, Prisma, Supabase, PostgreSQL, Docker, Tailwind CSS.

Web Developer

Sep. 2021 – Sep. 2022

- I built front-ends with React JS, handling markup and deployment of web platforms.
- **Tech:** React, HTML, JavaScript, MongoDB, Digital Ocean.

Web Master

Apr. 2021 – Sep. 2021

- I maintained the corporate websites and improved their interface and search ranking, looking after performance, security and availability.
- **Tech:** WordPress, Drupal, HTML, CSS, JavaScript.

Agencia Sima Digital

Cartagena, Colombia

Web Master

May. 2020 – Apr. 2021

- I built WordPress sites for small businesses.
- I managed hosting on CPanel and Linux.
- **Tech:** WordPress, HTML, Web Hosting.

PROJECTS

Dogesti — Operations system for small businesses

dogesti.com

- A small business runs everything in one place: inventory by location, point of sale, and electronic invoicing with Colombia's tax authority. One account can manage several companies.
- **Tech:** Next JS, Supabase, Tailwind CSS, shadcn/ui, TypeScript.

Viatro — Travel expense reporting

- Filing travel expenses without hunting for receipts: each trip keeps its entries by category, with the receipt attached and the invoice scanned by QR. I built it because I travel to events and was doing this by hand.
- **Tech:** Next JS, Prisma, PostgreSQL, Clerk, AWS S3, PWA.

Artemis II Tracker — 3D visualization of the NASA mission

github.com/pipegoods/artemis-ii-tracker

- The Orion spacecraft on its way to the Moon and back, in 3D, following the real trajectory published by NASA's JPL. It fits in a single HTML file.
- **Tech:** Three.js, WebGL, JavaScript, JPL data.

SKILLS

- **Programming languages:** TypeScript, JavaScript, Python, Dart, Go, SQL.
- **Frameworks:** Next.js, React, React Native, Flutter, Astro, FastAPI, Node.js, Tailwind CSS.
- **Data & infrastructure:** PostgreSQL, Prisma, Supabase, MongoDB, Docker, Digital Ocean, Vercel, Azure, Netlify.
- **Other:** RAG and multimodal models, REST APIs, Arduino, Git, Scrum.

LANGUAGES

Spanish: native · **English:** B2 reading and listening, B1 conversational.

EDUCATION

Universidad de Cartagena, Colombia

Dec. 2022

B.Sc. in Systems Engineering
